General Assembly | Boston, MA

Software Engineering Immersive – June '19 to current

12 week immersive software engineering bootcamp focusing on building interactive full-stack applications using popular technologies.

Projects: Built 3 full-stack single page applications and one interactive game.

- **States Visited App** – Keep track of the states you have visited along with some detailed information about each.
  - Technologies: Ruby on Rails, html/css, Bootstrap, JavaScript, jQuery

- **Bucket List App** – Create bucket list of items you want to complete.
  - Technologies: Express, html/css, Bootstrap, jQuery

- **Image Upload App** – This was a team project. Working together we created an app that will allows users to upload images to AWS for storage.
  - Technologies: Express, html/css, MongoDB, JavaScript

- **Tic Tac Toe** – An interactive game for a single user to play a game of tic tac toe.
  - Technologies: html/css, JavaScript

A.T. Cross | Providence, RI

Global Website/E-Commerce Manager – 2012– 2018

- Updated/maintained all company web properties for several brands.
- Directly oversaw all aspects of the company's web systems, including development, design and maintenance. The websites included global retail e-commerce sites as well as B2B marketing sites.
- Managed a team responsible for the operations including content updates, maintaining the product catalog, perform testing/QA of the site and bug fixes/issues.
- Served as the project manager on all web related projects as well as manage vendor relationships.

Webmaster – 2003-2012
- Created/updated pages for the North American website.
- Maintained product catalog

Internet Media Coordinator – 2002-2003
- Provided product images and descriptions for distributors and retailers.
